One of the primary reasons that the Monarch mind-control programming was named Monarch programming was because of the Monarch butterfly. The Monarch butterfly learns where it was born (its roots) and it passes this knowledge via genetics on to its offspring (from generation to generation). This was one of the key animals that tipped scientists off, that knowledge can be passed genetically.

Decreased sexual desire and frequency. Most research suggests that, during pregnancy, sexual desire and frequency of sexual relations decrease. In context of this overall decrease in desire, some studies indicate a second-trimester increase, preceding a decrease. However, these decreases are not universal: a significant number of women report greater sexual satisfaction throughout their ...
