### **How Far Is The Earth**

Are you wondering how far is the Moon from Earth? Well, the exact number is an average of 384,399 km, or 238,854 miles. This number is an average because the Moon takes an elliptical orbit around ...

### **How Far Is The Moon From The Earth? | eNotes**

[/caption] The answer to "how far is Saturn from Earth" has a different answer every day. As the planets move along their orbital paths they move nearer and further in comparison to each other.

### **How Far is Saturn from Earth? - Universe Today**

The exact distance between Earth and the Sun varies with its position in its orbit, which is elliptical. The average distance (the mean distance) between the Earth and the Sun is about 150 million ...

### **How far is the Earth from the Sun - answers.com**

Get an answer for 'How far is Heaven from Earth? I have read that, the earthly telescopes or advanced ones can go through space until they reach a black envelop which, no machine from earth can ...

### **How Far Is Heaven From Earth | eNotes**

The far side of the Moon is the hemisphere of the Moon that always faces away from Earth. The far side's terrain is rugged with a multitude of impact craters and relatively few flat lunar maria. It has one of the largest craters in the Solar System, the South Pole-Aitken basin. Both sides of the Moon experience two weeks of sunlight followed by two weeks of night; the far side is sometimes ...

[/caption] Here's a quick answer: Neptune is approximately 4.4 billion km away from the Earth. Have you ever wondered how far Neptune is from the Earth? It's actually a bit of a trick question.

### **How Far is Neptune from Earth? - Universe Today**

Landsat 8 orbits the Earth every 99 minutes. This means that every area of land on Earth is imaged at least once every 16 days. The satellite orbits at an altitude of 705 kilometers above the Earth in a near polar orbit (around the Earth from North Pole to South Pole).

### **FarEarth Live - View live satellite imagery!**

I've lost count of the number of times I've read that the "first Earth-like exoplanet" has been discovered. With nearly 2000 exoplanets found to date, it is no wonder so many of them will ...

### **The five most Earth-like exoplanets (so far)**

Earth and Moon to Scale 1 pixel = 600 kilometers The average distance between Earth and Moon is approximately 30 times Earth's diameter. If you could fly to the Moon at a constant speed of 1000 kilometers per hour, which is the speed of a fast passenger jet, it would take sixteen days to get there.

### **Earth-Moon size and distance**

Elliptical orbit. The AU is the average distance from the Earth to the sun. Earth makes a complete revolution around the sun every 365.25 days — one year. However, Earth's orbit is not a perfect ...
