How Much Wood Could A

This is an American English language tongue-twister that is used to train children to master speech, set in a fun rhyme of alike sounding words.

How much wood would a woodchuck chuck if a woodchuck could ...

How much wood would a woodchuck chuck is an American English-language tongue-twister. The woodchuck from the Algonquian word "wejack" is a kind of marmot regionally called a groundhog. The complete beginning of the tongue-twister usually goes: "How much wood would a woodchuck chuck if a woodchuck could chuck wood?" The tongue-twister relies primarily on alliteration to achieve its effects ...

Iroko is a large hardwood tree from the west coast of tropical Africa that can live up to 500 years. The tree is known to the Yoruba as ìròkò, logo or loko and is believed to have supernatural properties. Iroko is known to the Igbo people as oji wood. It is one of the woods sometimes referred to as African teak, although it is unrelated to the teak family.
