Tinnitus is the perception of sound in the head or the ears. The term tinnitus derives from the Latin word tinnire, meaning to ring. Typically, an individual perceives the sound in the absence of outside sounds, and the perception is unrelated to any external source.

Tinnitus: Introduction, Philosophy, and Classification ...

Standard anatomical terms of location deal unambiguously with the anatomy of animals, including humans.. All vertebrates (including humans) have the same basic body plan - they are strictly bilaterally symmetrical in early embryonic stages and largely bilaterally symmetrical in adulthood. That is, they have mirror-image left and right halves if divided down the middle.

Anatomical terms of location - Wikipedia

Our Mission The mission of Emory Healthcare's Medical Laboratory Science Program is to provide exceptional education and training to prepare future Medical Laboratory Scientists with the knowledge, skills, and attitude necessary to become leaders in the profession of clinical laboratory science.
