Lightning Protection Lightning is a giant spark of electricity in the atmosphere or between the atmosphere and the ground. In the initial stages of development, air acts as an insulator between the positive and negative charges in the cloud and between the cloud and the ground; however, when the differences in charges becomes too great, this insulating capacity of the air breaks down and there ...

Miniature anodized aluminum license plate bolt can be used to replace existing bolts to provide extra illumination where needed. Sold individually, typical applications require two. 12V DC operation, 12" power wires. Available with silver or black finish.

### **Miniature LED License Plate Bolt - Stud Mount | Super ...**

A dry thunderstorm is a thunderstorm that produces thunder and lightning, but most or all of its precipitation evaporates before reaching the ground. Dry lightning refers to lightning strikes occurring in this situation. Both are so common in the American West that they are sometimes used interchangeably. The latter term is a technical misnomer since lightning itself is neither wet nor dry.

### **Dry thunderstorm - Wikipedia**

12VDC Bolt LED light can be used to replace other bolts for exterior and interior accent lighting. Commonly used on motorcycles, car license plates, step lights in cars, and anywhere where you are using a 12 volt system. These LEDs are sunlight visible.
