Perception In Philosophy

The philosophy of perception is concerned with the nature of perceptual experience and the status of perceptual data, in particular how they relate to beliefs about, or knowledge of, the world. Any explicit account of perception requires a commitment to one of a variety of ontological or metaphysical views. Philosophers distinguish internalist accounts, which assume that perceptions of objects ...

An illusion is a distortion of the senses, which can reveal how the human brain normally organizes and interprets sensory stimulation. Though illusions distort our perception of reality, they are generally shared by most people. Illusions may occur with any of the human senses, but visual illusions (optical illusions) are the best-known and understood.

The Origin of Selfhood: A Functionalist Account Based on the Predictive Processing Paradigm.
Speaker: Zong Ning From: The University of Tokyo URL: Abstract: In this paper I examine the notion of selfhood through the lens of the predictive processing paradigm. I argue that an agent's individual existence is essentially associated with the reflexive capacity of information processing, or ...

Philosophy is inescapable. Your philosophy is your worldview, which is a backdrop for all thought and a context for all knowledge. The decision about examining philosophy is between: 1) to make your philosophy explicit, or 2) to be a slave to the subconscious notions, principles, and other people's philosophies picked up throughout life.

Epistemology What is Epistemology? Epistemology is the study of our method of acquiring knowledge. It answers the question, "How do we know?" It encompasses the nature of concepts, the constructing of concepts, the validity of the senses, logical reasoning, as well as thoughts, ideas, memories, emotions, and all things mental. It is concerned with how our minds are related to reality, and ...

Summary. Following Hermann von Helmholtz, who described visual perceptions as unconscious inferences from sensory data and knowledge derived from the past, perceptions are regarded as similar to predictive hypotheses of science, but are psychologically projected into external space and accepted as our most immediate reality.

A survey of the history of Western philosophy. Although less confident about the prospects of philosophical progress, J. L. Austin placed his emphasis even more exclusively on ordinary language. The very observation of linguistic behavior is itself a worthwhile activity, Austin believed, especially with regard to practical matters.
